'while

Brand Guidelines

Time. Craft. Comfort.

DESIGN EDITION / 2026

About this guide

This guide defines how ‘while looks, speaks, and creates experiences. It brings together the principles, assets, and application rules that keep the brand recognizable across physical, digital, sensory, and AI-assisted work.

Who it is for

Internal teams, designers, collaborators, and production partners.

STATUS

A design guideline prototype. Proposed systems and unfinished production specifications are identified where relevant.

How to use this book

Start with the foundation

Read the strategy and choose the relevant approved logo, color, and type role.

Select an application

Use the closest touchpoint example. Keep its fixed elements; adapt only the permitted variables.

Build with source assets

Use vector logos and authentic font files. Generated lettering is never a master asset.

Review before release

Check the application against brand, technical, accessibility, and factual criteria.

STATUS KEY / Established: documented in supplied work. Proposed: a new rule or study for approval. Pending: requires production testing or missing factual information.

Requirement coverage

Brand overview / pp.06–17

Manifesto; purpose, vision and mission; audience; positioning; personality; voice; strategic pillars.

Primary identity / pp.18–31

Wordmark; variations; selection; spacing; size tests; co-branding; color; typography.

Secondary assets / pp.32–43

Original contour; patterns; functional icons; grids; image direction; asset-combination examples.

Experience + applications / pp.44–67

Journey; spatial adaptation; motion; materials; sound; touch; scent; ten touchpoint examples.

AI prompt guide / pp.68–80

Recommended tools and roles; shared foundation; ten application modules; prohibited outputs; review and release.

All assignment topics are represented. Proposed examples and unverified production data are explicitly labelled.

01

Brand Overview

Dessert is a reason to stay.

An after-dinner ritual

'while is a seated, after-dinner Italian gelato and wine experience. Three small pairings arrive one at a time, moving from a bright opening to a creamy middle and a lingering finish.

The pauses between courses leave room for conversation, discovery, and a little more time together.

Our manifesto

We believe the evening deserves a little more time.

Time to notice a new flavor, linger over a conversation, and enjoy the company across the table. Some of the moments we want to keep happen after the plates have been cleared, when there is still more to say.

‘while makes room for those moments. Italian gelato and wine come together in three thoughtful courses: a cool spoonful, a small sip, and a pause to see how the flavors unfold.

Come with curiosity. We’ll take care of the details.

Take Your Sweet Time.

Make room for more.

Why we exist

Purpose

To turn dessert into a social pause.

Vision

To make an unhurried dessert experience a familiar way to continue the evening.

Mission

We create thoughtful gelato and Italian wine pairings, served one course at a time, with room for conversation between them.

For a little more time

Audience

Adults aged 35 and older, especially couples and close friends who want to continue spending time together after dinner. Curious about wine, they value thoughtful food, comfortable surroundings, and conversation.

A Coursed Ice Cream Bar

A seated, gelato-led experience that brings the structure of a tasting menu to an intimate after-dinner occasion. Small Italian wine pairings arrive sequentially, giving each course its own moment.

The Effortless Host

Thoughtful, warm, and unhurried. ‘while anticipates what guests need and offers gentle guidance at the right moment. Every detail is considered, while the experience feels easy.

Thoughtful

Warm

Unhurried

Voice in practice

Concise. Suggestive. Pairing-led.

USE

Try the gelato, then the wine. Notice what changes.

AVOID / Follow these steps for the correct tasting experience.

USE

Stay for another taste.

AVOID / Hurry. Don’t miss out.

USE

Bright citrus meets gentle bubbles.

AVOID / An unparalleled gastronomic indulgence.

Time. Craft. Comfort.

Time

Sequential service, spacious compositions, and gentle transitions give each moment time to be noticed.

Craft

Every pairing and material is chosen with intention. Flavor, typography, ceramics, and finishing details work together.

Comfort

Familiar language, clear information, and intimate seating make discovery feel easy, regardless of wine knowledge.

A little at a time

01

Bright Start

Lemon Sorbet & Rosé
A bright, refreshing opening.

02

Soft Middle

Pistachio Gelato & Prosecco
A creamier, nuttier middle.

03

Long Finish

Vanilla Gelato & Moscato d’Asti
A soft, lingering finish.

Service architecture

One ritual. Four ways to enter.

Pairing Menu for Two

The signature three-course experience for two guests, served one pairing at a time.

Seasonal Pairing Menu

Three new courses built from seasonal gelato while retaining the same paced structure.

Single Pair

A shorter entry into the experience for guests choosing one pairing.

Zero-Proof Pairing Menu

The same three-course framework without alcohol. Specific pairings must be confirmed.

ADAPTATION RULE / Preserve approachable language and intentional pairing in every format. Do not invent prices, service duration, ingredients, or availability.

A consistent vocabulary

Name and category

Write the name as 'while. Use the supplied logo for graphic signatures. "Coursed Ice Cream Bar" is the established category descriptor.

Product language

Use "gelato" in experience copy and "sorbet" where applicable. Say "pairing" for the relationship between dessert and wine.

Course language

Bright Start / Soft Middle / Long Finish. Describe the progression as bright, creamy, and lingering.

Invitation language

Prefer "Try this next," "Stay for another taste," and "Take Your Sweet Time." Keep information direct and welcoming.

AVOID / Hurry, exclusive indulgence, ultimate luxury, expert-only vocabulary, invented superlatives. Do not imply every product contains alcohol.

02

Primary Visual Identity

A recognizable identity, applied with care.

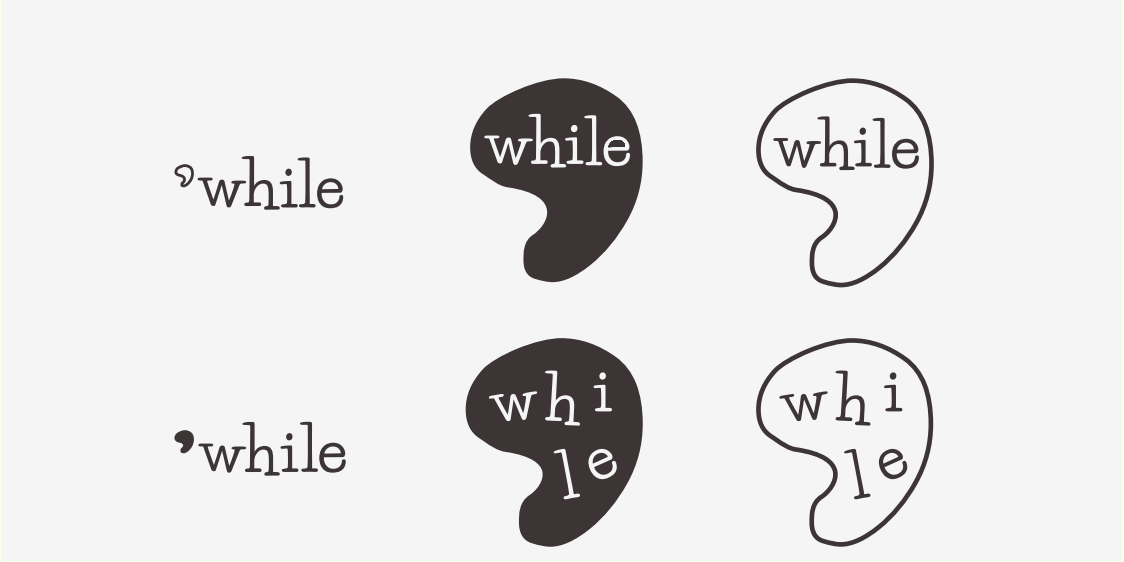

The primary wordmark

'while

Use the supplied artwork.

Preserve the custom letterforms, spacing, proportions, and distinctive apostrophe. Never retype or redraw the wordmark.

Approved variations

Choose from the supplied horizontal, filled, and outlined forms. Use the horizontal mark for compact signatures; larger organic variations can anchor labels, charms, and brand moments.

Color applications

Select from the supplied color versions. Match the logo to its background with clear separation and preserve the complete mark.

PROPOSED PRODUCTION RULES

Space and scale

CLEAR SPACE STUDY

Use the apostrophe height as a candidate spacing unit around the horizontal wordmark. Confirm this unit against all approved variations before release.

MINIMUM SIZE

Pending print and screen testing. Check the outline and dispersed-letter versions separately; do not assign an untested minimum.

Protect the artwork

Do not stretch

Scale the supplied artwork proportionally.

Do not retype

Chubbo is a supporting typeface, not a replacement logo.

Do not alter the apostrophe

Keep its original contour and relationship to the letters.

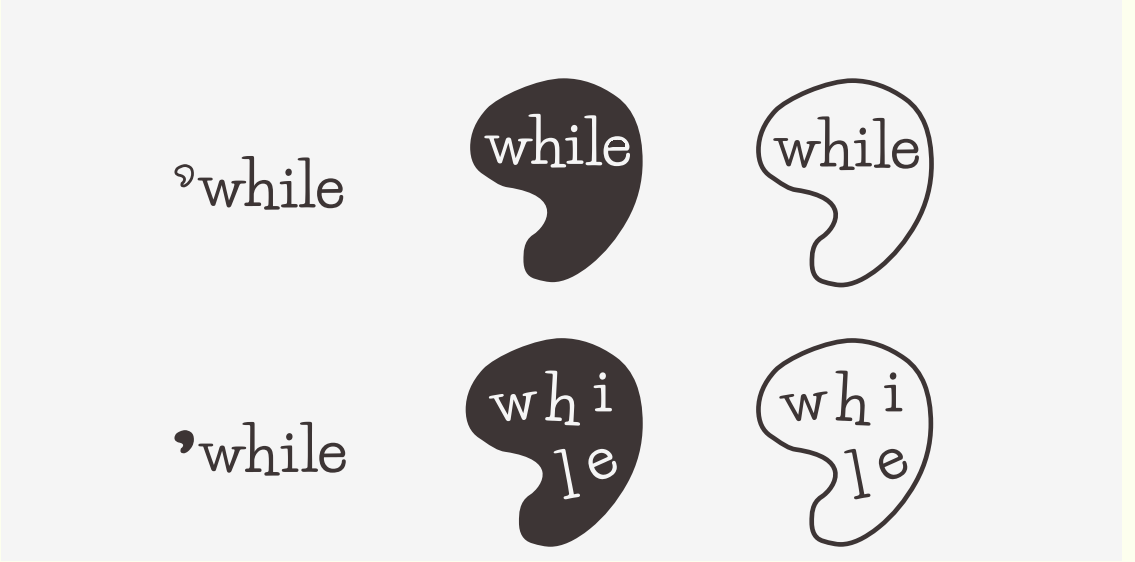

Do not add effects

Avoid shadows, gradients, outlines, or decorative additions.

Do not rearrange

Use the approved compositions rather than new letter arrangements.

Choose the right mark

Horizontal wordmark

Use for compact signatures, digital headers, and text-led packaging.

Filled organic form

Use when the mark needs a self-contained presence, as on charms or labels.

Outline and dispersed forms

Use at a scale that preserves contour and letter separation. Select approved artwork; do not make new arrangements.

PROPOSED RULE / CONFIRM BEFORE PRODUCTION

Clear-space construction

x = apostrophe height

Reserve at least x around the visible horizontal artwork. The diagram includes extra bounds around the source artwork; set final guides to the visible logo edges in the master vector file.

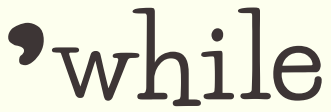

For organic logo versions, use a proposed exclusion zone of 1/4 of the outer shape height. No text, trim edge, image detail, or partner mark may enter the zone.

ACTUAL-SIZE PRINT STUDY / NOT RELEASED LIMITS

Minimum-size test sheet

2.50 in wide

1.75 in wide

1.25 in wide

0.88 in wide

TEST / Print at 100%. Check apostrophe separation, counters, thin strokes, and word recognition. Repeat in reverse and on the actual stock. Set the minimum only after the smallest acceptable sample is approved.

SCREEN / Test the SVG at actual CSS sizes and multiple display densities. Check each variation separately. These samples are size studies, not validated thresholds.

Co-branding

Separate identities. Balanced presence.

Match perceived visual weight

Adjust overall scale and placement. Equal visual emphasis does not require equal bounding-box dimensions.

Preserve both artworks

Use official supplied assets, retain proportions, and give each mark its required clear space.

Caption the relationship

Identify Aesop and Slowear concepts as speculative collaborations. The partner block above is a placement diagram, not an official lockup.

Color palette

Warm Orange

#FF9A3E / RGB 255 154 62

Soft Cream

#FDFFEE / RGB 253 255 238

Deep Charcoal

#3D3535 / RGB 61 53 53

Print conversions must be checked against the chosen stock, print process, and proof. Natural material colors may appear in photography.

Color and legibility

Take Your Sweet Time.

Charcoal on cream / 11.78:1 / Use for body text

Take Your Sweet Time.

Charcoal on orange / 5.65:1 / Use for body text

Take Your Sweet Time.

Orange on cream / 2.08:1 / Do not use for essential text

Digital baseline: WCAG 2.2 AA requires 4.5:1 for normal text and 3:1 for large text. Logo artwork is exempt, but must remain recognizable. Orange/cream is a brand combination, not an accessible body-text combination.

Print: verify a physical proof. Screen contrast calculations do not predict ink, paper, finish, or lighting.

Typography

Chubbo

Display / headlines / course names

National Park

Body / navigation / labels / tagline

A little at a time.

Three small courses, brought to your table one at a time.

BOOK SETTINGS / Body 10.5–11 pt; leading 15–16 pt.
Headlines 24–36 pt. Captions 8–9 pt. Use authentic font files.

PROPOSED WORKING SPECIFICATIONS

Type roles and spacing

Take your time.

DISPLAY / Chubbo 32 / 36 pt

A little at a time.

SECTION / Chubbo 24 / 29 pt

Three small courses, brought to your table one at a time. Keep paragraphs left-aligned with a ragged right edge.

BODY / National Park 10.5 / 15 pt

Bright Start / Lemon Sorbet & Rosé

CAPTION / National Park 8.5 / 12 pt

Use a 6 pt spacing unit: 6 / 12 / 18 / 24 / 36 / 48. Begin with 12 pt between heading and text, 24–36 pt between groups. Avoid faux bold, stretched letters, justified paragraphs, and narrow long-form columns.

One shared contour

Use the original vector silhouette as a separate supporting asset. Keep logo compositions intact. Vary scale, repetition, placement, and cropping while preserving the contour.

SUPPORTING GRAPHIC / PROPOSED SYSTEM

PROPOSED VECTOR CONSTRUCTION

Pattern system

Build patterns from the approved silhouette rather than generated approximations. Use repetition and spacing to express an unhurried rhythm.

Spaced Repeat

Consistent scale, generous gaps. Tissue and packaging interiors.

Paired Forms

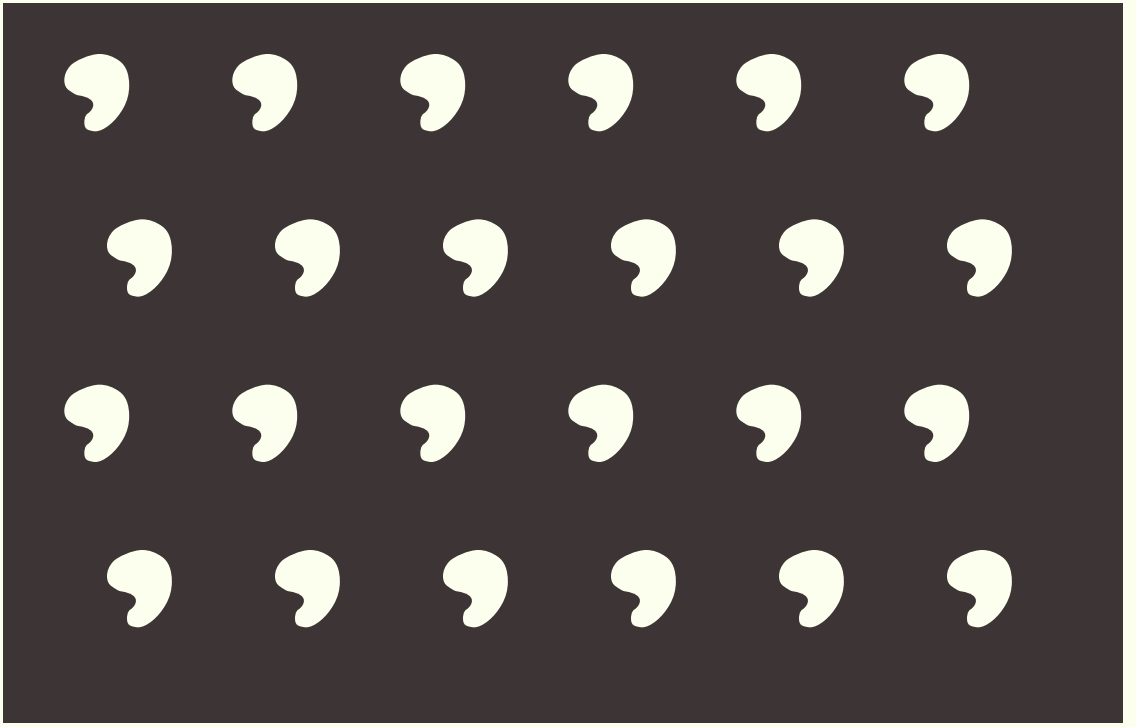

Two forms in relation. Textiles and tray liners.

Cropped Contour

Enlarged outline at the edge. Editorial layouts.

PROPOSED PATTERN / ORIGINAL VECTOR CONTOUR

Spaced repeat

A measured rhythm.

Unit height h; horizontal pitch 2.2h; vertical pitch 2.1h. Keep all units at one scale and orientation. Use on tissue, packaging interiors, and tray liners.

PROPOSED PATTERN / MIRRORED SUPPORTING SHAPE

Paired forms

Two forms in conversation.

Keep a visible gap between the pair. Mirroring is permitted only in this proposed supporting pattern, never in the logo. Use paired units selectively on textiles; retain generous negative space.

PROPOSED EDITORIAL GRAPHIC

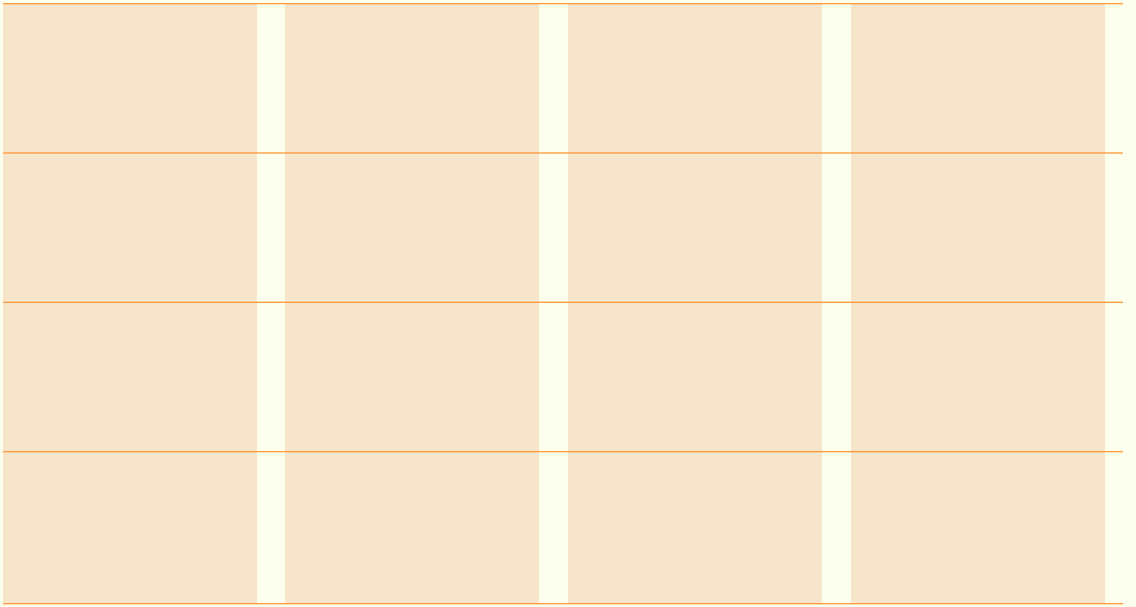

Cropped contour

One contour. One focal point.

Enlarge the original path proportionally and crop it at the layout edge. Start at 2–4 times the repeat unit. Keep the notch recognizable; avoid cropping logo artwork or placing small text over the contour.

Layout and grid

7 × 8.5 IN / FOUR-COLUMN PAGE

Inside margin 0.65 in; outside 0.5 in.
Top 0.55 in; bottom 0.65 in. Gutter 0.15 in.
Use full-width body copy and narrower side notes. Keep long paragraphs out of narrow columns.

Combining assets

One clear focal point.

Let typography, photography, and supporting graphics work in a shared hierarchy. Keep the logo and essential information clear of patterns and busy imagery.

CONTROLLED FLEXIBILITY / Scale, crop, alignment, and spacing.

Three layout templates

Statement + image

Use one expressive headline and one calm photograph.

Information + detail

Use a full-width reading column with a supporting detail.

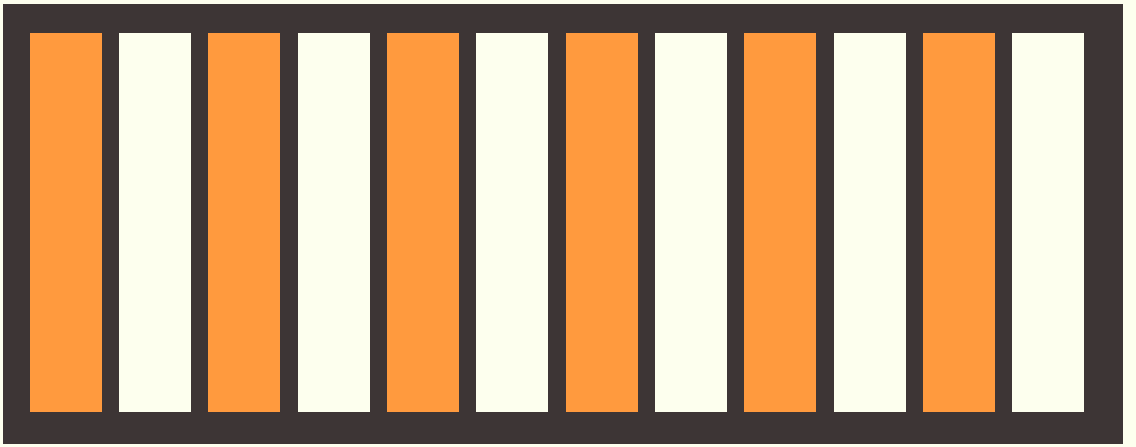

Three-course sequence

Use equal containers and consistent title, description, and progress positions.

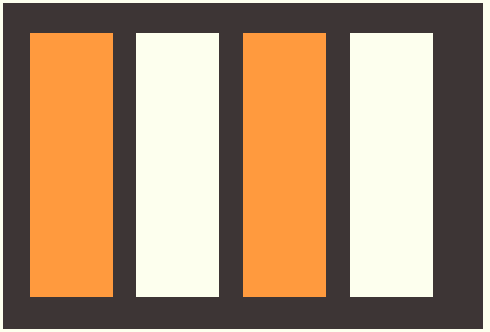

Keep shared alignment across formats. Templates define relationships, not mandatory image/text proportions.

PROPOSED RESPONSIVE GRID

From page to screen

DESKTOP / 12 COLUMNS / 5% SIDE MARGINS

MOBILE / 4 COLUMNS

Stack sections in content order. Keep the full logo visible. Use real text, readable controls, and intentional image crops.

Start with 24 px mobile side margins and 16 px gutters; test at narrow widths. Breakpoints follow content fit, not device labels.

Photography direction

Human scale. Warm light. Real materials.

Show small servings, natural gestures, intimate tables, and tactile details. Use believable textures, gentle shadows, and uncluttered compositions.

Generated imagery

Build from references

Specify the approved atmosphere, portions, materials, palette, and camera position.

Keep identity exact

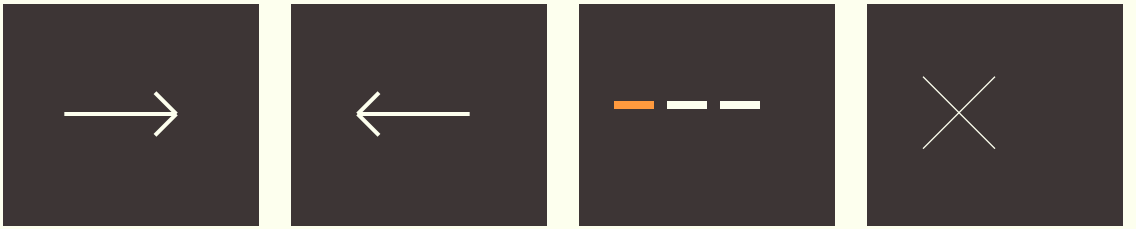

Apply original logos and authentic typography in the final artwork. Generated lettering is not an identity asset.

Review the result

Check food proportions, glassware, hands, construction, label text, and light. Reject unrelated decoration and invented business information.

PROPOSED FUNCTIONAL STYLE / NOT A NEW LOGO SYSTEM

Icons and illustration

Functional icons

Use simple arrows, progress marks, and controls only where they clarify interaction. Label controls in National Park; color is never the only cue.

Illustration

Photography is the primary image language. If an explanatory diagram is needed, use simple lines, approved colors, and the page grid.

Avoid

New mascots, decorative food icons, grape motifs, ornate Italian imagery, unrelated blobs, and generated brand symbols.

03

Experiential Identity

An experience that unfolds one pairing at a time.

The guest journey

01 ## Arrive

Understand the offer through the entrance, signage, and welcome.

02 ## Settle In

Feel comfortable through seating, materials, and a clear menu.

03 ## Discover

Experience three pairings sequentially, with room to notice.

04 ## Linger

Let the final taste and conversation continue.

05 ## Take It With You

Carry the ritual home through packaging and selected objects.

Adapt the setting

Permanent venue

Use the fullest material expression: terracotta, upholstery, small tables, visible service, and a quiet sound environment.

Expo or festival

Keep a seated tasting pocket, clear waiting/service zones, legible entry information, and sequential service.

Mobile format

Reduce the footprint, not the experience logic. Keep nearby seating and clear service circulation.

Digital or take-home

Translate pacing into progressive information and flavor order. Do not present the take-home package as identical to seated service.

FIXED / Time, Craft, Comfort; approachable language; exact identity.
FLEXIBLE / Footprint, material construction, crop, layout, and interaction.

Material and touch

Make the identity tangible.

Terracotta, ceramic serving pieces, textiles, and wine glass charms connect the brand to objects guests touch. Each detail should support comfort, recognition, or interaction.

Charm dimensions, material, and attachment require prototype testing.

Sound and scent

Sound / Italian cinematic jazz

Instrumental selections establish warmth and rhythm while leaving conversation in the foreground. Use the supplied Piero Piccioni references as a mood direction, with consistent volume and gentle transitions.

Scent / Flavors first. Scents after.

Keep the tasting area free from added fragrance. Introduce aromatic products in a separate hand-washing space after the food-and-wine experience.

A tactile material palette

Terracotta and ceramic

Use tactile surfaces in serving and architecture. Food-contact suitability, sealing, durability, and cleaning require supplier confirmation.

Textile and upholstery

Use soft finishes to support comfort and reduce harshness. Choose finishes for actual maintenance and wear conditions.

Wine glass charms

Preserve the contour; test weight, attachment, edge comfort, legibility, and repeated cleaning before production.

These are material intentions. Do not label untested materials as food-safe, sustainable, acoustic-rated, or certified.

Sound, touch, scent

Sound reference

Piero Piccioni instrumental film scores are the supplied reference direction. Curate gentle cinematic jazz, avoid abrupt changes, and keep conversation intelligible.

Touch reference

Terracotta, ceramic serving objects, upholstery, and the glass charm are the established touchpoints. Test these as real objects, not only rendered images.

Scent reference

The Aesop concept belongs in a separate hand-washing area. No ambient fragrance in the active tasting space.

Spatial relationship

Keep washing and aromatic retail discovery separate from serving. Use the guest journey to connect them after the final course.

LISTENING REFERENCES / Piero Piccioni

youtu.be/gGjUt4bYJNY · youtu.be/PmnAsPfenmg

Confirm playback permissions and venue settings.

PROPOSED MOTION STUDY

Motion principles

A gentle arrival, a clear pause, and an easy transition. Use motion to introduce information and reveal progression while keeping the supplied artwork intact.

Preserve

Move or fade the complete asset. Do not morph its contour.

Pace

Leave a readable hold between transitions.

Respect

Provide a static version and reduced-motion behavior.

STORYBOARD / NOT A FINISHED ANIMATION

A quiet sequence

Arrive

0.0–0.8 s / fade in

Stay

0.8–3.2 s / hold

Continue

3.2–4.0 s / fade out

Proposed timing for testing. Transition between approved logo versions using separate fades; do not generate intermediate shapes.

PROPOSED BEHAVIOR SPECIFICATION

Motion and interaction states

Brand reveal

0.8 s fade in; 2.4 s readable hold; 0.8 s fade out. Test the rhythm in context. Keep the logo contour and proportions fixed.

Interface transition

Start with a 200–300 ms content fade. Update title, pairing, description, and progress together. Do not block interaction with timed waits.

Focus and selection

Use visible focus, clear active states, and labels such as Next Course and Previous Course. Never rely on orange alone to show progress.

Reduced motion

Replace decorative movement with immediate state changes or a minimal fade. Preserve every piece of content and control.

Rule diagram: arrive → hold → depart. For the explorer: Bright Start → Soft Middle → Long Finish → Begin Again.

BRAND APPLICATION

Store interior

A permanent setting for an unhurried ritual. Intimate seating and warm materials bring Time, Craft, and Comfort into the space.

KEEP / Small tables, visible service, warm light, restrained signage.

Wine glass charms

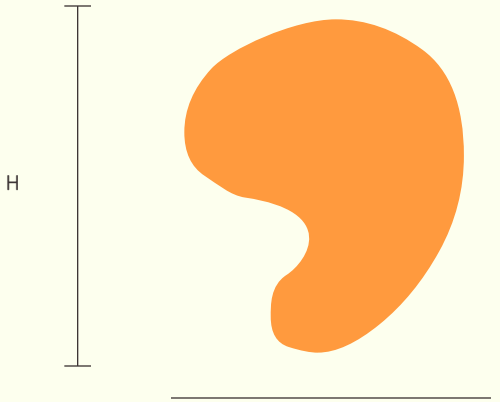

A physical marker that accompanies the pairing. The approved silhouette extends recognition beyond printed materials.

DEVELOP / Confirm attachment, material, legibility, cleanability, and the role of the information on the reverse.

TECHNICAL INTENT / PROTOTYPE REQUIRED

Charm construction study

W / maintain source aspect ratio

Front

Use the approved silhouette and original mark. Keep the artwork clear of the attachment area.

Reverse

Use a consistent information hierarchy for the pairing. Do not add tiny copy that cannot be read on the final object.

Production gate

Confirm material, dimensions, attachment method, edge finish, weight, cleaning, and print method with a physical prototype.

BRAND APPLICATION

Wine expo

A temporary pause within a busy exhibition. Sequential tasting and intimate conversation remain central.

ADAPT / Circulation, waiting space, service access, and surrounding noise.

BRAND APPLICATION

Mobility branding

A travelling expression of 'while. A compact counter and adjoining seating bring the paced tasting into temporary settings.

KEEP / Complete wordmark, National Park tagline, clear service and seating.

SPECULATIVE COLLABORATION

'while × Slowear

Taking time extends into clothing and everyday objects through tactile fabrics, restrained branding, and considered details.

APPLY / Original artwork in embroidery, labels, and controlled textile repeats.

SPECULATIVE COLLABORATION

’while × Aesop

Three conceptual hand washes translate the pairing sequence into an aromatic ritual encountered after the tasting.

KEEP / Equal perceived logo size, left-aligned labels, one left-hand carton.

BRAND APPLICATION

Wine-infused gelato

A take-home interpretation of the three-course experience. Names and arrangement connect the flavors within one packaging system.

KEEP / No course numbers. Shared label grid, original logo, cream and orange.

PROPOSED FLAT ARTWORK / NOT A DIELINE

Packaging information system

'while

Bright Start

Rosé Lemon Sorbet

Wine-Infused · Special Edition

SECONDARY PANEL

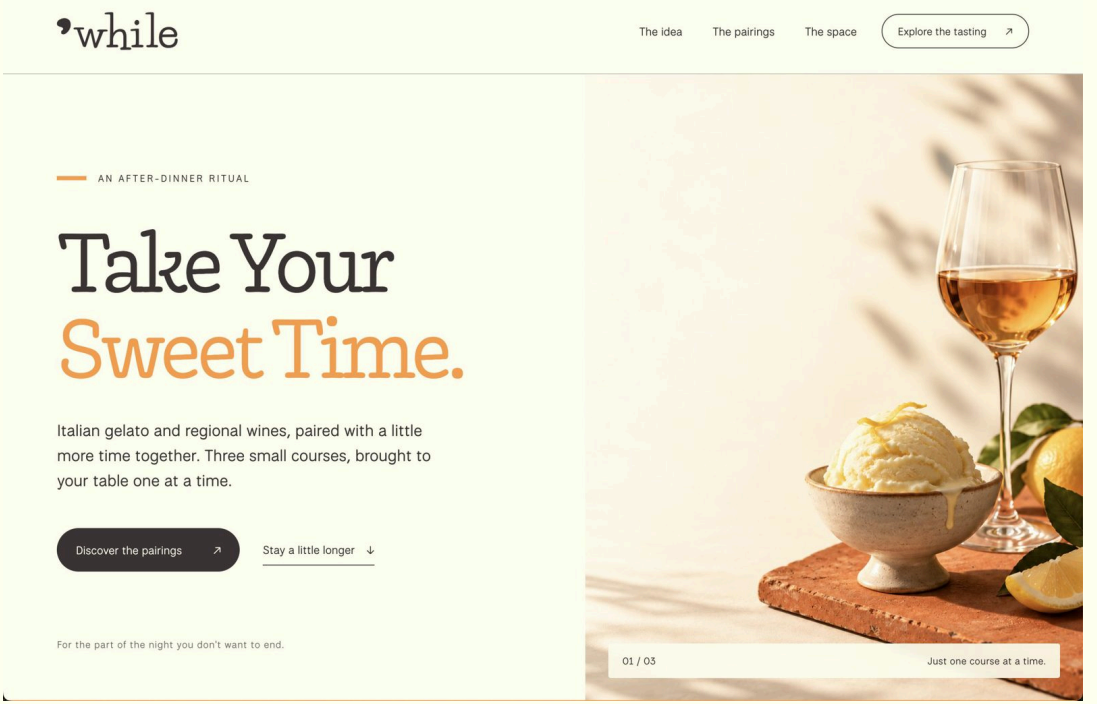

Reserve space for finalized product, storage, allergen, quantity, producer, and jurisdiction-specific information.

Hierarchy: original logo → course title → flavor → collection descriptor. No course numbers or flavor-specific brand colors. Label dimensions must come from the selected container and supplier dieline.

Never invent ingredients, alcohol percentage, net quantity, certifications, or product claims. This diagram reserves space; it is not retail-ready label approval.

BRAND APPLICATION

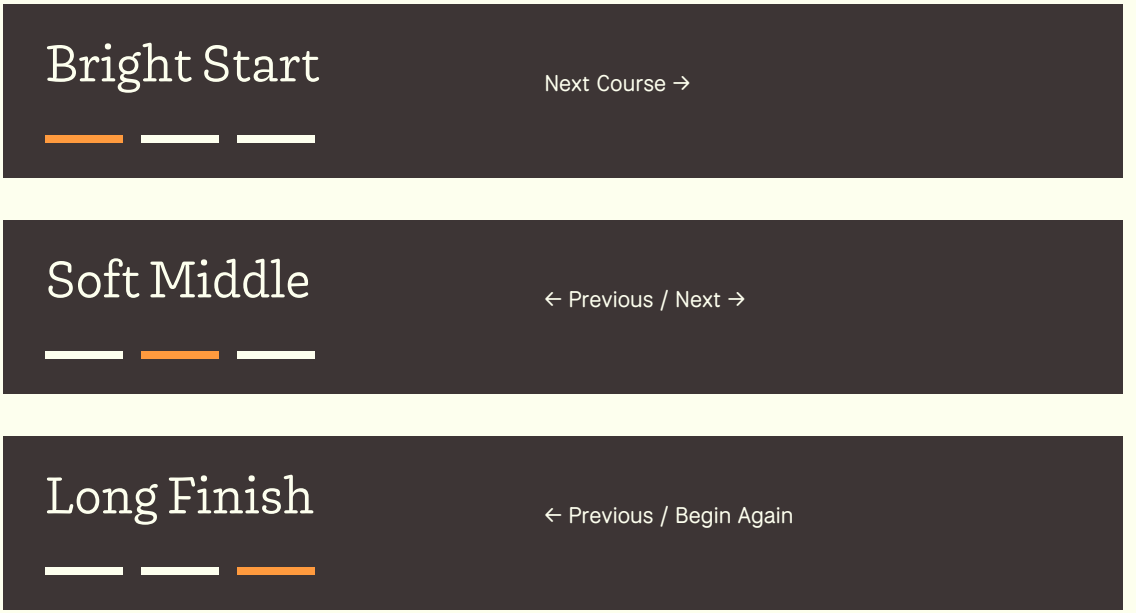

Digital experience

Visitors discover the idea, explore one course at a time, and encounter the atmosphere of the space.

KEEP / Sequential navigation, readable controls, responsive layouts. Screenshot is an existing concept, not a live-site audit.

Sequential digital experience

One active course at a time.

Begin at Bright Start. Allow backward navigation after the first course. Update content and progress together; announce changes to assistive technology. Support keyboard focus and reduced motion. Test desktop, tablet, and mobile.

PROPOSED MENU STUDY

Print / editorial

A compact pairing menu uses the same hierarchy across three courses. Develop the reverse with the philosophy, service formats, and final menu information.

PROPOSED TYPOGRAPHIC STUDY

Social sequence

Three connected posts introduce the progression. Keep a shared grid and vary the title and approved color relationship. Apply original assets during final production.

FORMAT STUDY / Adapt to the chosen platform before publication.

PROPOSED CONTENT / NO INVENTED EVENT DETAILS

Print and social copy

Menu / opening

A little at a time.
Three small pairings. A little more time together.

Course card / Bright Start

Lemon Sorbet & Rosé
Try the gelato, then the wine. Notice what changes.

Social / Soft Middle

Pistachio Gelato & Prosecco
A creamier middle. Stay for another taste.

Social / Long Finish

Vanilla Gelato & Moscato d’Asti
Let the evening linger. Take Your Sweet Time.

Apply the shared grid to a folded menu and a three-post sequence. Keep meaningful copy in the caption as well as the image. Final dimensions depend on the chosen print and social formats.

Human direction. AI execution.

The designer defines creative intent, approves the identity, and evaluates the result. AI supports execution within that direction.

Text assistance

Briefs, copy drafts, and prompt structure. Review meaning and voice.

Image generation

Atmosphere and application studies. Review fidelity and realism.

Code assistance

Layouts and interactions. Test behavior and accessibility.

Record the actual tool and version used for each project. This is a role guide, not a confirmed approved-tool list.

Permanent / flexible

Permanent

Purpose, audience, values, approved logos, colors, typography, voice, and asset-fidelity requirements.

Flexible

Application, composition, image crop, scale, placement, camera position, deliverable format, and context-specific production needs.

Controlled flexibility

Adapt the application while keeping the identity recognizable.

Recommended tool roles

ChatGPT / language assistance

Use for brief structure, copy alternatives, prompt refinement, and requirement checks. The designer reviews every factual statement and brand decision.

ChatGPT image generation

Use for exploratory scenes and application visualizations. Use original artwork and authentic fonts for final labels and logos.

Codex / implementation assistance

Use for responsive layout, interaction, document assembly, and repeatable checks. Inspect and test the rendered output.

Illustrator / InDesign / compositing

Use for master artwork and final typography. These are production tools; they are not listed here as generative AI tools.

Recommended workflow, pending owner approval. Record actual tool/model, date, input assets, prompt, revisions, and reviewer for each output.

Reusable prompt

Brand foundation

Apply the established strategy, values, voice, and supplied assets.

Project brief

Define the application, audience context, and intended experience.

Visual direction

Specify composition, type, color, material, imagery, and placement.

Deliverables

State formats, views, dimensions, and supporting files.

Review criteria

Verify fidelity, readability, consistency, and project requirements.

Prompt in practice

WINE-INFUSED GELATO / PROMPT EXCERPT

Create three coordinated tasting-sized tubs: Bright Start, Soft Middle, and Long Finish. Use cream surfaces, charcoal typography, and restrained orange rims. Preserve the supplied wordmark. Distinguish flavors by name, without course numbers.

REVIEW / Exact logo and font artwork must be applied directly. Check label consistency, product order, and realistic packaging. Do not invent alcohol content or ingredient claims.

Application modules 1–2

Store Interior

BRIEF / Create an intimate seated gelato-and-wine setting for adults 35+, with courses served separately.

DIRECTION / Use cream and terracotta, small tables, upholstered seating, visible service, and modest original-logo signage.

OUTPUT + REVIEW / Show one overall view and one material detail; check scale, circulation, identity, and absence of added fragrance.

Wine Glass Charms

BRIEF / Develop a physical pairing marker from the approved original silhouette.

DIRECTION / Preserve contour; separate front identity from reverse pairing information. Keep the attachment area clear.

OUTPUT + REVIEW / Show front, reverse, and attached view; identify unconfirmed size, material, and manufacturing requirements.

Application modules 3–4

Wine Expo

BRIEF / Translate the ritual into a temporary seated tasting pocket within a busy expo.

DIRECTION / Use a welcoming edge, service counter, small tables, warm light, restrained branding, and clear waiting space.

OUTPUT + REVIEW / Show an overall view and layout; do not invent footprint or event details. Check sequential service and practical scale.

Mobility Branding

BRIEF / Create a compact vehicle activation with a fold-out counter and adjoining seating.

DIRECTION / Use cream exterior, controlled orange accents, original side wordmark, and National Park tagline.

OUTPUT + REVIEW / Show side/rear placement and the open setup; check readability, proportions, service access, and nearby seating.

Application modules 5–6

Slowear Collaboration

BRIEF / Create a speculative overshirt, T-shirt, scarf, and tote capsule around taking time.

DIRECTION / Use approved palette, original logos, natural fabric appearance, restrained embroidery, and contour-based scarf pattern.

OUTPUT + REVIEW / Show collection and details; use official partner artwork only. Clearly caption speculative status.

Aesop Collaboration

BRIEF / Create three conceptual aromatic hand washes inspired by the three courses.

DIRECTION / Arrange amber bottles and one left carton; use left-aligned labels, balanced original logos, and approved fonts.

OUTPUT + REVIEW / Show readable packaging; remove the right carton. Do not invent formulations or imply an official partnership.

Application modules 7–8

Wine-Infused Gelato

BRIEF / Create three coordinated tubs: Rosé Lemon, Prosecco Pistachio, and Moscato Vanilla.

DIRECTION / Use cream, charcoal, restrained orange rims, original wordmark, and authentic typography. No course numbers.

OUTPUT + REVIEW / Show the trio and label detail. Check order and consistency; do not invent alcohol content or required product data.

Brand Website

BRIEF / Introduce the concept and let visitors explore one course at a time.

DIRECTION / Use a clear responsive grid, authentic assets, warm imagery, and predictable sequential controls.

OUTPUT + REVIEW / Provide responsive screens and a tested explorer. Verify navigation, keyboard focus, content order, and reduced motion.

Application modules 9–10

Print / Editorial

BRIEF / Create a compact pairing menu or editorial foldout for the seated experience.

DIRECTION / Use one reading hierarchy, course grouping, original logo, and generous margins. Keep prices and unknown details out.

OUTPUT + REVIEW / Show flat artwork and folded view; check actual-size readability, safe areas, and stock-dependent print proof.

Social Sequence

BRIEF / Create three connected posts introducing Bright Start, Soft Middle, and Long Finish.

DIRECTION / Use one grid, shared title placement, approved colors, concise invitations, and selected imagery or contour graphics.

OUTPUT + REVIEW / Show all three posts and captions. Check cropping, readable text, clear sequence, and no invented dates or availability.

Before release

- [ ] Original logos and proportions preserved.
- [ ] Authentic Chubbo and National Park applied.
- [ ] Approved palette and readable contrast checked.
- [ ] Course order and project-specific rules verified.
- [ ] Images checked for plausible scale and materials.
- [ ] No invented facts or unsupported product claims.
- [ ] Speculative collaborations clearly identified.
- [ ] Print proof and final designer review completed.

DESIGN & STRATEGY / Paige Cui

Source material: Paige Cui, BX+CX; Prompt as a Design System. Existing concept images are retained from the supplied presentations. Pattern, grid, motion, menu, and social systems include proposed development. Font files: Chubbo and National Park.

Review and approval

1 / Designer review

Check purpose, values, voice, original assets, hierarchy, and the application brief. Reject identity drift and decorative additions without a role.

2 / Technical review

Check actual-size legibility, image quality, dimensions, bleed, font embedding, accessibility, and interaction. Confirm supplier-specific data.

3 / Owner approval

Review the final composed output. Record approver, version, date, exceptions, and release context before external use.

4 / Archive

Store source files, original assets, prompt and tool record, approved exports, and a short change log. Retire superseded versions.

RELEASE GATES / Logo size tests; exact dielines; supplier materials; partner artwork/permission; factual product data; print proof. Proposed values remain proposals until approved.
